PROFILE

Junior developer with a bachelor's degree, a year of work-study experience at Inetum and two development internships. Since completing my work-study placement in September 2024, I have continued developing personal projects and tools used at MNS. I want to strengthen my Java/Spring and Angular skills within an experienced team, bringing a service-oriented approach and experience building applications for real needs.

TECHNICAL SKILLS

Development Java · Spring (exploratory projects) · Angular · TypeScript · React · Python · PHP · Symfony
Data and APIs PostgreSQL · SQL · Relational design · ORM · Migrations · API REST
Quality and delivery GitLab · Merge requests · Pipelines CI/CD · Docker · Pytest · Nginx · Cloudflare

EXPERIENCE

Digital support adviser / Civic service • MNS in Wattrelos | Dec 2025 – present

• Developed SSP Planning, used by 3 medical and social services secretaries to generate duty schedules around leave, remote work and unavailability.

• Created PMI Letters: one-click generation of at least 15 letters per week, previously prepared individually by the PMI manager.

• Provided IT support to colleagues and helped around 10 service users per week with online procedures.

AI / Full-stack Developer • Inetum, Lille | Sep 2023 – Sep 2024 • Work-study placement

• Designed and developed a profile recommendation application for projects, from requirements analysis to deployment preparation, using Python and PostgreSQL.

• Created GitLab CI/CD pipelines, used Docker, tested with Pytest and worked with merge requests; daily check-ins and weekly reviews.

• Built small Spring projects to explore AI-generated documentation; contributed to documentation work for Blancheporte.

Angular Developer • TCD Web | Jan – Feb 2023 • Internship

• Contributed as part of a team to developing and verifying features in Formation TST, a training management application for Engie, using Angular, TypeScript and NestJS. Daily progress tracking.

PHP Developer • Artanime | May – Jun 2022 • Internship

• Independently built the Artanime association website from mockup to launch, using PHP and MariaDB, with Trello tracking and weekly presentations.

PROJECTS AND CURRENT PRACTICE

Game Room • React, Node.js, Socket.IO — Real-time multiplayer application with server-side rule validation and session recovery.

Sheet – RPG Manager • Python, Flask, SQLite — Character, inventory and progression management, separating business rules from data access.

Designed application architecture and developed features, using AI for generic functions, tests and documentation. Deployed, updated and diagnosed applications with Docker, Nginx and Cloudflare.

EDUCATION AND LANGUAGES

Bachelor's degree in Information Systems Administration • JUNIA XP | 2024 • Awarded

DevOps coursework: deployment, automation, maintenance and continuous integration.

BTS SIO, software development specialisation • Saint-Rémi, Roubaix | 2023 • Awarded

French: native • English: B2
